PROFESSIONAL SUMMARY

Backend-focused fullstack engineer with hands-on experience designing and shipping production systems for Nigerian startups. Comfortable owning entire features end-to-end, from database schema and API design to deployment and CI/CD. Experienced with scalable REST APIs, subscription billing (Paystack), KYC verification (Dojah), and cloud infrastructure. Currently pursuing a B.Sc. at Obafemi Awolowo University while contributing to multiple live products.

EXPERIENCE

Backend Engineer — MyFitHub *Aug 2025 – Present*

Fitness subscription platform connecting users to gyms, yoga, swimming, boxing & wellness centers across Nigeria.

- Architected the backend system from the ground up using Node.js, TypeScript, and PostgreSQL, defining data models and service boundaries for a multi-vendor subscription platform.
- Built and integrated a full Paystack subscription flow including recurring billing, webhook handling, plan management, and automated payment retries.
- Designed a scalable venue and membership management system supporting multiple fitness categories and flexible subscription tiers.
- Wrote robust, well-documented REST APIs consumed by the mobile and web frontend teams.

Backend Engineer — Makeatask *Oct 2025 – Present*

Nigerian marketplace connecting clients with vetted professionals for virtual and physical task fulfillment.

- Led backend system architecture decisions for a two-sided marketplace supporting service providers and clients.
- Integrated Dojah KYC verification pipeline — including document capture, liveness checks, and automated user verification status updates via webhooks.
- Built scalable Node.js/TypeScript APIs with PostgreSQL, handling user onboarding, task creation, bidding, and service delivery workflows.
- Designed database schemas optimized for complex relational queries across users, tasks, bids, and transactions.
- Collaborated closely with frontend engineers to define API contracts and ensure smooth end-to-end integration.

Lead Fullstack Developer — Creativity Verse *May 2025 – Dec 2025*

Creative agency — sole developer responsible for the company's entire web presence.

- Spearheaded the full-stack development of the company website from zero, independently building both the React.js frontend and Node.js/Express backend.

- Led a small development team, setting technical direction, reviewing code, and coordinating delivery timelines.
- Set up cloud infrastructure and implemented CI/CD pipelines, reducing manual deployment overhead and improving release reliability.
- Delivered the full product on schedule in an agile environment, coordinating directly with stakeholders.

PROJECTS

DailyDrip — Personal Finance App · *NestJS · Next.js · PostgreSQL · TypeScript*

In Development

- Building a mobile-first personal finance app with a unique time-locked envelope budgeting system — auto-disbursing daily allowances from locked category budgets to enforce spending discipline.
- Architecting the backend with NestJS and PostgreSQL; designing a scheduled job system for midnight micro-disbursements with push notifications.
- Leading the full product design including UI/UX wireframes, API design, and frontend implementation in Next.js.

PaySub VTU Platform · *React · Node.js · Express · MongoDB · Tailwind CSS*

- Built a virtual top-up platform for airtime, data bundles, and utility bill payments with secure third-party payment integration.
- Developed a clean, responsive React frontend and a REST API backend with MongoDB, handling real-time transaction processing.

GPS360 Academy — Online Learning Platform · *Next.js · Node.js · Express · PostgreSQL · Stripe API*

- Developed a comprehensive e-learning platform with course management, progress tracking, interactive quizzes, and Stripe payment integration for course enrollment.

Layer3 Cloud — Corporate Portfolio · *Next.js · Tailwind CSS*

- Designed and built the full marketing website for a Nigerian cloud infrastructure company, focusing on clean UI, performance, and responsive design.

SKILLS

Languages & Runtimes: TypeScript, JavaScript (Node.js), SQL

Backend: Node.js, Express.js, NestJS, REST API Design, JWT Auth, WebSockets

Frontend: React.js, Next.js, Tailwind CSS

Databases: PostgreSQL, MongoDB, Database Schema Design

Integrations: Paystack (subscriptions, recurring billing), Dojah (KYC), Stripe

DevOps & Tools: Git, CI/CD, Cloud Deployment, Vercel, VPS, Agile / Scrum

EDUCATION

B.Sc., Obafemi Awolowo University — Ile-Ife, Nigeria *2023 – 2027*
