

Adebayo Praise O.

Software Engineer

Summary

Software Engineer with expertise in designing, developing, and optimizing web applications. Skilled in full-stack development, with proficiency in JavaScript, MERN stack (MongoDB, Express.js, React, Node.js), and cloud-based solutions. Experienced in API development, system architecture, and performance optimization. Passionate about building scalable, efficient, and user-friendly software solutions.

Work Experience

Backend Engineer, Luxlodge(Remote)

Oct 2024 - Jan 2025

- Develop, test, and maintain server-side applications using Node.js, Express.js and other libraries needed.
- Ensure scalability, security, and performance of backend services.
- Conduct API testing and debugging using Postman.
- Collaborate with frontend developers, designers, and product teams to deliver high-quality products.
- Design, build, and maintain RESTful and GraphQL APIs for seamless frontend integration

Software Engineer intern, HNG(Remote)

Jan 2025 - present

- Write clean, maintainable, and efficient code under the guidance of senior developers. Debug and resolve cross-browser compatibility issues
- Help with the testing, debugging, and performance optimization of applications.
- Learn and apply industry best practices in version control (Git), Agile methodology, and software testing.
- Contribute to the creation of API integrations and work with databases.
- Assist in the development and maintenance of web applications using JavaScript, Node.js, React, and other tech stacks.

Education

Bachelor of Science in Industrial Chemistry

Obafemi Awolowo University

2023 - 2027

High School

Ajike comprehensive school

2018-2021

Passions

Coding Challenges

Enjoying solving problems with codes and engaging in hackatons

Mentorship

Dedicated to helping others grow by sharing knowledge and experience in programming

Skills

Technical Skills

- Fullstack Developer
- Application Programming
- Git workflow management
- Version control system
- Software testing and debugging

Software

- React Js
- Node Js
- Next Js
- Express Js
- MongoDB

Languages

- English (Fluent).

Operating Systems

Linux, Windows, Mac

Additional Information

- Served as Processing Assistance in a pharmaceutical company
- Served as a sound engineer at Daminet's Production
- Completed a pro MERN stack course.
